DINESH KUMAR S

dinesh8904135166@gmail.com | +91 8904135166 | Bengaluru, India | linkedin.com/in/dinesh-s-gowda

OBJECTIVE

Driven and detail-oriented Engineering graduate with a strong foundation in software development and hands-on experience with Python, SQL, JavaScript, React.js, and modern web technologies. Demonstrates strong problem-solving, analytical, and learning abilities, with practical experience developing web applications through academic projects and hands-on training. Seeking a Software Engineer role to leverage technical skills, contribute to impactful projects, and grow as a professional.

EDUCATION

AMC Engineering College – Computer Science – Data Science, B.E – Bengaluru, India Dec 2022 – Jul 2026
CGPA: 8.0

EXPERIENCE

Dhee Coding Lab | Python Full Stack Trainee |Jan 2026 – Apr 2026 (4 Months)

- Successfully Completed intensive training in Python, SQL, HTML, CSS, JavaScript, React.js, and Full Stack Web Development.
- Developed responsive and interactive web applications using modern front-end technologies and coding practices.
- Gained hands-on experience in SQL database management, data manipulation, query writing, and optimization.
- Strengthened problem-solving, debugging, and SDLC knowledge through coding assignments and mini-projects.

SKILLS

Programming Languages: JavaScript, Core Python

Frontend: HTML5, CSS3, JavaScript, React.js

Backend: Django

Databases: MySQL

Tools: VS Cod

PROJECTS

Smart Irrigation System Using AI and IOT
Technologies: Python, IoT, Arduino, Soil Moisture Sensor, Cloud Analytics

- Designed and developed an AI and IoT-based Smart Irrigation System using real-time soil moisture and environmental data.
- Integrated IoT sensors and cloud-based monitoring for real-time data visualization and remote access.
- Implemented intelligent irrigation logic to optimize water consumption and improve agricultural efficiency.
- Developed dashboards and alert mechanisms to support effective irrigation management and reduce unnecessary water usage.

Text-to-Speech Converter
Technologies: Python, PyPDF2, gTTS

- Built a PDF-to-Speech Converter in Python that extracts text from PDF files and converts it into natural-sounding audio.
- Used PyPDF2 for reliable text extraction and gTTS for speech synthesis.
- Enabled seamless document-to-audio conversion to improve accessibility and usability.

CERTIFICATIONS

- Python Full Stack Development
- Aptitude and Soft Skills Training Program
